

Dear Chairman Powell;

I have listened to the happenings around the FCC for years and have normally supported what you are doing. However, I now get the distinct feeling, that the FCC believes bigger is better and is no longer interested in watching out for the interests of the people that you work for, all the citizens of the U.S. and not just a few large corporations.

With continuing deregulation of the media, you have taken what was once a necessary and vibrant part of our small communities and turned them into cookie cutter solutions with no interest in serving the needs of the community.

I, for one, would like to know when and how we went wrong. Where once, when we heard sirens or wondered about the weather, we could turn to our local radio station and get an update, we now find out by word of mouth.

In Shelbyville, KY, the change has been very troubling. 101.7, which used to serve the community, now serves Louisville, KY and has no interest in our small community.

Mr. Chairman, where will it end. As a voter and a strong supporter of our current administration, I take offense to the use of the commissions powers to take away what is important to the majority of the citizens of this country in order to allow certain large corporations a better bottom line.

Please have someone explain how the changes will benefit me and my community.
Please try to change how I feel about what is happening.

Today's vote was just more of the same and there are a lot of people that feel as I do. Please do what is right for all the people, not just a very small subset of the people that you appear to support.
